Frequently asked questions

- **What is hanging weight?** “Hanging weight” is the weight of the animal after the slaughter process which removes the head, internal organs, hooves, hide. You can expect a "take home weight” in packaged meat of about 60%-70% of the hanging weight, depending on the cuts you choose.

- **What is my cost compared to retail?** On average, your cost per pound of 'take home' beef to be between $6.50/lb-$7.75/lb depending on how much you purchase and which cuts you choose. This is for everything from ground beef to choice steaks. Compare this to average retail grassfed ground beef costing $7.50 per pound.

- **How much meat will I take home?** A whole beef 'take home' weight is about 250-350lb depending on the animal, a half is about 130-175lb, and a quarter 60lb-85lb. We will estimate as close as possible at the beginning, but please remember that the final weights will vary and we can't give you an exact number until the butcher calls your order is ready.

- **How much freezer space do I need?** About 1cu. ft of freezer space for each 25lb of beef. For a whole beef you will need a 14cu ft freezer space, half a 7 cu ft, and a quarter a 3.5 cu ft.

**Special Requests:** (This is where you can indicate, among other things, if you want anything like bones, kidney/heart/liver/ since these do not go into the freezer unless requested. If you are not buying the whole animal I cannot guarantee the organs or the oxtail. These go to the first person to reserve a side.)
